RENEWA

Do environmental conservation and earn reward

Idea Title : Greener Environment

Problem Statement: Deforestation, Water Scarcity, Environmental Degradation and Unsustainable Consumption, Air Pollution, Improper Disposal of Waste,Lacking Awareness in Environmental Issues.

Solutions Aligned with Sustainable Development Goals (SDGs) or Schedule VII : GreenSnap, AquaConserve, Eco-Harvest, Clean Commute, EnviroShots, Environment Matters.

1. GreenSnap

•Goals Aligned:

- **SDG 13 (Climate Action):** Promotes actions to combat climate change.
- **SDG 15 (Life on Land):** Encourages planting and protecting greenery to restore ecosystems.

•Impacts:

- Encourages urban gardening and tree plantation, reducing the carbon footprint.
- Improves air quality and biodiversity through green initiatives..

2. AquaConserve

•Goals Aligned:

- **SDG 12 (Responsible Consumption and Production):** Advocates for responsible water usage.

•Impacts:

- Promotes water conservation techniques, such as using less water consumption faucets and showerheads.
- Reduces water wastage in households and industries.

3. Eco-Harvest

•Goals Aligned:

- **SDG 12 (Responsible Consumption and Production):** Encourages sustainable farming practices in home.

•Impacts:

- Supports eco-friendly farming techniques, such as organic farming and permaculture.
- Reduces the use of chemical fertilizers and pesticides, improving soil health.

4. Clean Commute

•Goals Aligned:

- **SDG 11 (Sustainable Cities and Communities):** Encourages sustainable urban transportation.
- **SDG 13 (Climate Action):** Reduces greenhouse gas emissions from vehicles.

Impacts:

- Promotes the use of public transport, carpooling, cycling, and electric vehicles.
- Decreases traffic congestion and air pollution.
- Saves energy and enhances urban mobility.

5. EnviroShots

•Goals Aligned:

- **SDG 11 (Sustainable cities and communmities):** The city becomes cleaner and greener.
- **SDG 4 (Climate Action):**Reduces Global warming.
- **SDG 15 (Life on Land):**Reduces improper waste disposals and improves sanity.
- **SDG 15 (Clean Water and sanitation):**Reduces improper waste disposals on lands and water bodies.

•Impacts:

- Uses powerful media (photos/videos) to highlight environmental problems and solutions.
- Educates communities on the importance of sustainability.

6. Environment Matters

•Goals Aligned:

- **SDG 13 (Climate Action):** Advocates for policies and practices to combat climate change.

•Impacts:

- Provides a platform to discuss environmental challenges and solutions.
- Empowers citizens to participate in sustainability efforts.
- Influences policymakers and institutions to prioritize environmental protection.

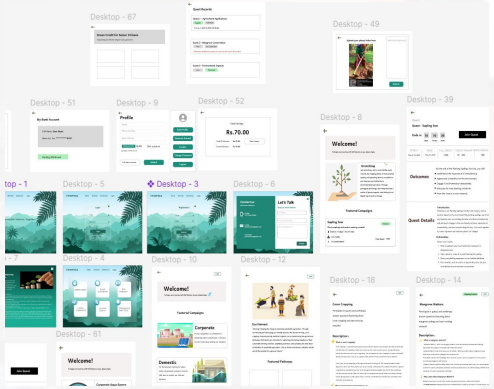
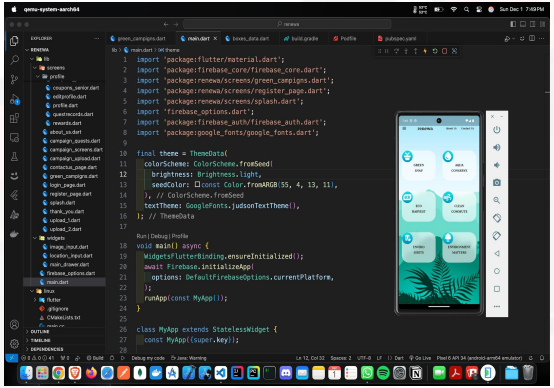
Designs



Prototype



Product Development

Responsibilities:

- Design the app's interface and user experience (UI/UX).
- Develop the MVP with key feature
- Conduct bug fixing and app maintenance during testing.

Key Milestones:

- Complete wireframes and UI design in Weeks 1-2.
- Develop application with more updates and features.
- Deliver MVP by Week 4 and iterate based on feedback.

Future Updates

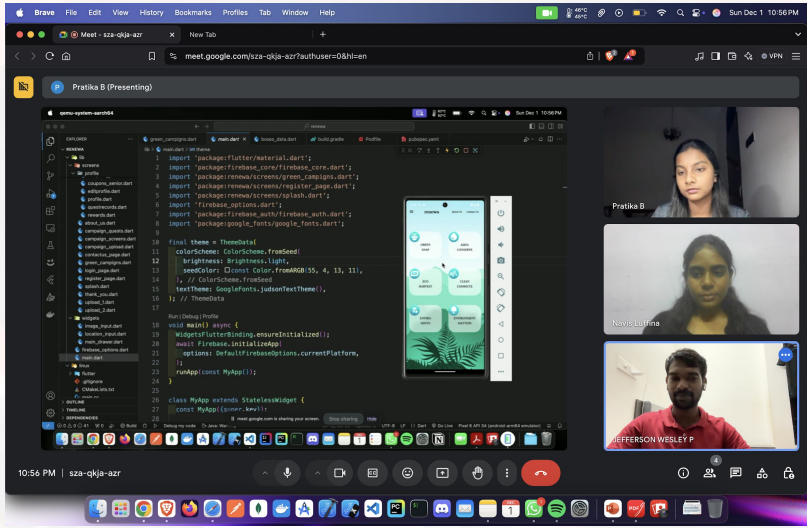
- Wet waste turned into fertilizers
- Bee cross pollination

Budget Plan:

- **Initial Setup Costs**
  - **App Development & Design**: ₹10,000
  - **Branding & Marketing Material**: ₹25,000

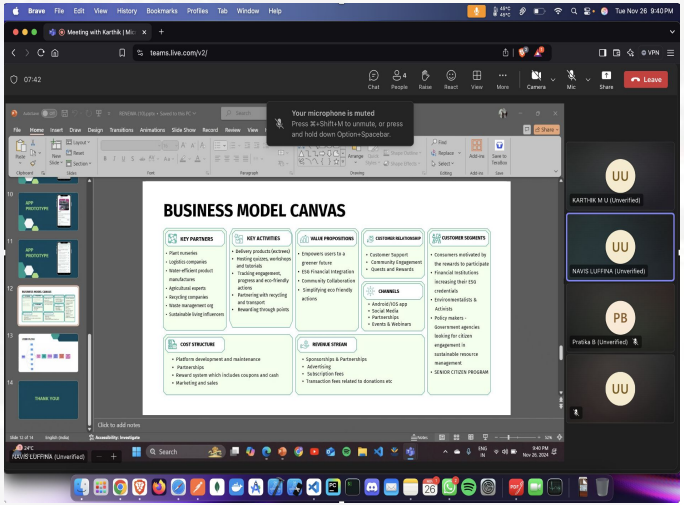
- **Ongoing Monthly Costs**
  - **Technology & Hosting**: ₹17,500/month
  - **User Acquisition & Marketing**: ₹30,000/month

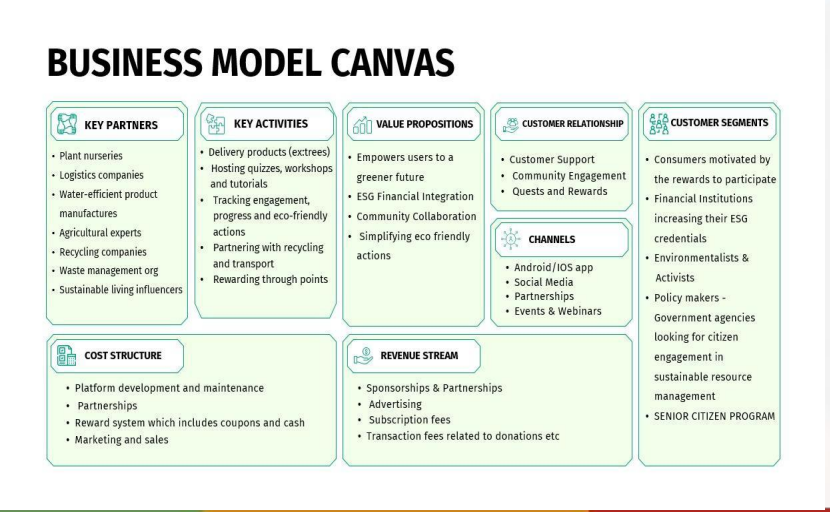
- **Replenishment & Scalability Costs**
  - **Product Inventory**: ₹40,000/quarter
  - **Shipping & Delivery**: ₹10,000/month



Business Model Canvas Development Status

- **Completion Level**: **75% completed**
- **Key Areas Developed**:
  - **Customer Segments**: Defined primary and secondary target audiences.
  - **Value Propositions**: Articulated the core solutions addressing key pain points.
  - **Channels**: Identified major communication and delivery platforms.
  - **Revenue Streams**: Drafted potential monetization strategies.
- **Pending Areas**:
  - **Cost Structure**: Need further detailing of operational and fixed costs.
  - **Key Partnerships**: Identifying and formalizing external collaborations.
  - **Metrics and Validation**: Refining KPIs and validating assumptions with feedback





Business Model Canvas Development

Market Segment Targeted

- **Primary Segment**:
  - **Eco-conscious individuals**: People actively seeking to participate in sustainable initiatives (e.g., environmentalists, volunteers,
  - students).
  - **Organizations**: NGOs, corporate CSR teams, or local governments focused on sustainability campaigns.
- **Secondary Segment**:
  - General public and tourists visiting environmentally sensitive areas (e.g., beaches, mangrove sites).

Competition in the Market

- **Competitors**:
  - Established sustainability-focused platforms (e.g., community cleanup apps, environmental awareness NGOs).
  - Apps that promote volunteer-driven environmental campaigns.
- **Differentiators**:
  - Our solution integrates **real-time campaign tracking**, **gamification elements** (rewards for participation), and
  - **educational modules** for greater awareness.

Key Performance Indicators (KPIs)

- **User Engagement Metrics**:
  - Number of campaigns organized and user participation rate per campaign.
  - Active monthly users on the platform.
- **Environmental Impact Metrics**:
  - Area of land/water cleaned or restored (in square meters).
  - Tons of waste or invasive species removed.
- **Awareness Metrics**:
  - Growth in public awareness through in-app quizzes and participation.
  - Repeat participation rate in campaigns.

Differentiating Factors

- **Integrated Platform**: Unlike competitors, combines **awareness, participation, and rewards** into one ecosystem.
- **Data-Driven Insights**: Regular environmental impact reports to motivate stakeholders.
- **Community-Driven Growth**: Emphasis on building active user communities around specific regions and causes.
- **Terrace Farming Support:**
- **Plant Distribution**: Encouraging terrace farming by sending plants to users.
- **Customized Nurture Plans**: Providing tailored care plans for each plant type.
- **Monitoring & Engagement**: Monthly monitoring of plant health and progress.
- **Daily Notifications**: Sending reminders for activities like watering and maintenance.
